

Sentinelle Medical's CFO Awarded 2008 Outstanding CMA/MBA Alumnus

Toronto, Canada: November 20, 2008 – Ian Heynen, CFO, Sentinelle Medical, has been awarded the 2008 Laurier MBA Outstanding CMA/MBA Alumnus. This award is given to a graduate who has demonstrated extraordinary achievement in strategic and financial management.

Judging Criteria include:

- The size and growth of the individual's organization
- His or her proven managerial acumen in the accounting field
- Demonstrated leadership, innovation and integrated organizational decision-making skills

Ian pursued Laurier's MBA with the Certified Management Accountant Option at Wilfred Laurier's Toronto campus. He graduated with an MBA in 2003, and was the Gold Medalist recipient for the School of Business & Economics. He received his CMA designation at about the same time.

Ian is both a licensed Professional Engineer and a CMA. He began his career in technology development and in financial leadership in the energy and manufacturing industries. Before joining Sentinelle, he was the Controller and National Business Development manager for GE Healthcare Canada.

Ian is providing strategic leadership for Sentinelle's regional expansion into the US and Europe, product portfolio expansion and is helping deliver on triple digit revenue growth.

"It is an honour to be recognized by Laurier," said Ian Heynen, Sentinelle's CFO. "After starting out my career as an engineer, the combined MBA/CMA program provided the foundation to effectively transition into leadership roles. These tools have been critical in a high growth environment like Sentinelle Medical".

"We are very proud of Ian at Laurier." says Hugh Munro, Director of Wilfred Laurier's MBA Program. "He was our gold medal winner for academic ability in the very first class of the MBA/CMA combination degree and designation program in 2003. Ian exemplifies what it means to be both an excellent student and a dedicated business leader. He has transitioned successfully across industries from chemical engineering to health care to his current position as Chief Financial Officer with Sentinelle. I couldn't think of a better candidate for The Laurier Outstanding CMA/MBA Alumnus Award 2008."

About Sentinelle Medical Inc.

Sentinelle Medical is dedicated to improving patient care with early detection and accurate intervention. The company researches, develops, manufactures, sells and supports leading edge Magnetic Resonance (MR) technologies.
